Projects

DineEasy | ReactJs, MongoDB, ExpressJS, NodeJS

Feb 2024 | Link

- Created an online restaurant reservation web app with MERN stack, enabling users to effortlessly browse, discover, and manage bookings.
- Ensured a seamless cross-platform experience through responsive design, secure user management, and comprehensive search functionality.
- Developed the application using Node.js, Express.js, React.js, and MongoDB, showcasing proficiency in full-stack development with cutting-edge technologies.
- Implemented DineEasy with a focus on performance and scalability, ensuring a reliable and efficient user experience for online restaurant reservations

ProCV Path | HTML, CSS, JavaScript

Oct 2023 | Link

- User-Friendly Interface: Offers an intuitive, step-by-step process for creating personalized resumes, making it easy for users of all experience levels to craft professional-looking resumes.
- Customizable Templates: Provides various design templates that users can customize to match their personal or professional branding.
- Real-Time Preview: Displays a live preview of the resume as users input their details, ensuring instant feedback on formatting and layout.
- Downloadable Formats: Allows users to download their finished resumes in multiple formats (e.g., PDF), catering to different application requirements.
- Cloud Deployment: The platform is hosted online, enabling easy access and updates without needing local installations.

Portfolio | HTML, CSS and JavaScript

Jul 2022 | Link

- Designed and implemented a responsive layout using HTML, CSS, and JavaScript for compatibility across devices.
- Integrated Font Awesome icons and custom animations to enhance user experience and visual appeal.
- Developed a mobile-friendly navigation menu using JavaScript, ensuring easy access on smaller screens.
- Built the site with a modular structure to enable efficient updates and scalability.
- Focused on creating a polished and user-friendly interface to effectively showcase my skills, projects, and professional journey.
- Demonstrated expertise in web development and attention to design aesthetics through this project.

Technical Skills

Languages: C++,Python, JavaScript, SQL

Developer Tools: VS Code, IntelliJ, MongoDB, MySQL

Frameworks: ReactJS, ExpressJS, NodeJS, Bootstrap, Tailwind-CSS, HTML

Soft Skills: Project Coordination, Communication, Leadership, Event Coordination, Technical Documentation

Certifications

- SQL For Data Science 2022
- Data Science and Hadoop 2023
- AWS Certified Cloud Practitioner (CLF-02) 2023
- Ethnus Certified MERN Stack Web-Developer 2023
